Compete for Scholarships!

Ohio students compete for scholarships that can be used at any college or university. Students who qualify for the National JSHS competition can win additional scholarships.

OHIO JSHS JUNIOR SCIENCE AND HUMANITIES SYMPOSIUM

63rd Ohio Regional Junior Science and Humanities Symposium

will be held at:

Capital University

in Columbus, Ohio

Friday, March 5, 2027

What is JSHS? The Junior Science and Humanities Symposium (JSHS) engages and publicly recognizes students (Grades 9-12) who are conducting research in the field of sciences, technology, engineering, or mathematics (STEM). At the Ohio regional JSHS, individual students compete for scholarships and recognition by presenting the results of their original research efforts before a panel of judges and an audience of their peers. The best projects receive college scholarships jointly sponsored by the United States Departments of the Army, Navy, and Air Force and five will advance to the national JSHS competition held later in the spring where students present their research with 300-400 students from the other 47 regional competitions. Additional scholarship and awards are available at each level.

Students who present their research at Ohio JSHS can:

- Qualify for college scholarships that can be used at any college or university and an invitation to JSHS National
- Develop skills to prepare for college pursuits in STEM fields
- Hear STEM professionals speak on their work and career paths

Direct questions to Dr. Carmen S. Dixon, cdixon2@capital.edu

Submission & registration information will be posted on Capital University's JSHS webpage in the fall, but you can check out past Ohio JSHS winners and learn more about the event now!

JSHS competition is approved by the National Association of Secondary School Principals, sponsored by research arms of the U.S. Department of Defense, and administered by colleges and universities with oversight of the National Science Teaching Association (NSTA).
