Food for Thought

...dinner and conversation with fellow students and Capital faculty

By Michael Herold

Join the Honors Council for a Food for Thought with Dr. David Reed, an associate professor in the Computer Science department, on **Wednesday, December 5, at 6:00 in Learning Center room 102.** Dr. Reed will be speaking about audio/video compression and HDTV. Audio and video compression is used to get the HDTV signal through

the standard definition pipeline, an impressive feat given that high-definition signal is over six times the information of a standard definition signal. Come learn the hows and whys of high-definition television and enjoy some pizza while you're at it! Any questions can be directed to Michael Herold at mherold@capital.edu.
