

## Connecting Your Macintosh Computer and iOS Devices to the Wi-Fi

Use these instructions to help you configure your Macintosh computer, iPad or iPhone to the University Wi-Fi.

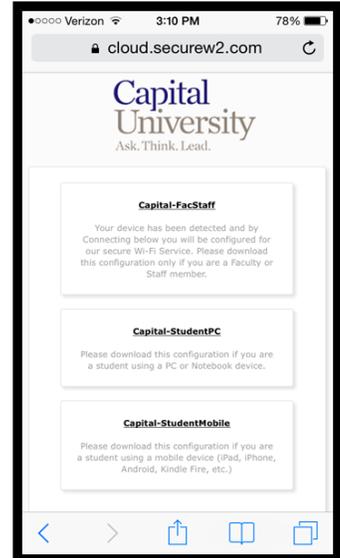

1

Go to **Settings** and then select **Wi-Fi**. Select the **Capital-GetConnected** network.

2

Open the **Safari Browser** (**do not use Chrome or IE**). Navigate to any website except Google. You will be redirected to a login page where you will put in your **Capital University** username and password. If you are not redirected, type "safeconnect.capital.edu" into your web browser address bar\*

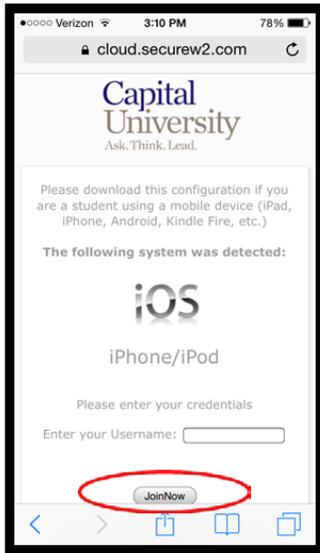

3

If you are a **student**, select either **Capital-StudentPC** to register your computer or **Capital-StudentMobile** to register your iPad or iPhone.

If you are **faculty or staff**, select **Capital-FacStaff** to register all devices.

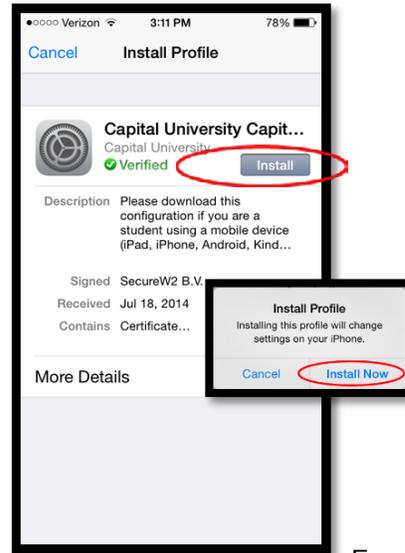

Check the box at the bottom to accept the **Acceptable Use Policy**.

4

The system should automatically detect your operating system or device type. If it identifies your system incorrectly, scroll down on the page and use the drop-down box to select the correct device type. Enter your Capital University username and click **Join Now**.

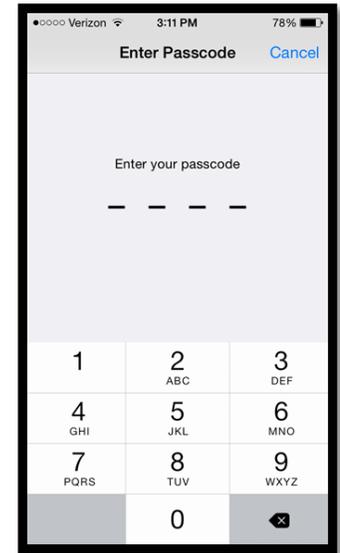

**\*Important:** You may need to turn off cellular data on your iPhone in order for the redirect page to load correctly

5

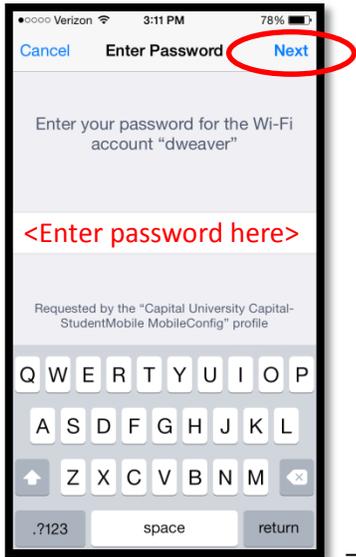

Click **Install** to install the SafeConnect software to your iOS device or computer.

Click **Install Now** when you see the pop up box (see above).

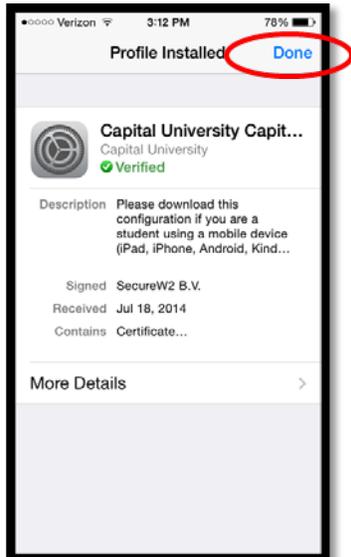

6

If you have a **Passcode Lock** on your computer or iOS device, you will need to enter it before the SafeConnect software can be installed.

7

Enter the **Password** for your Capital University account and then click **Next** at the top of your screen.

8

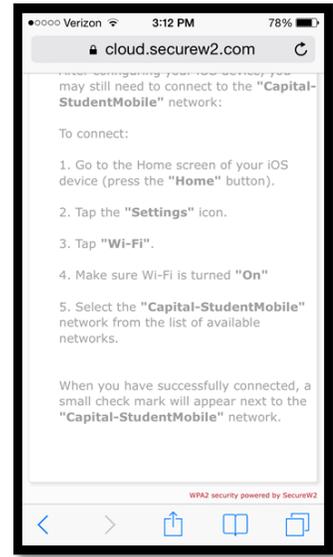

Click **Done** once the SafeConnect software has been installed and verified.

To make sure you are connected to the correct network by going back to **Settings** and then **Wi-Fi**.

**Capital-StudentMobile (For iOS devices), Capital-StudentPC (For Students) or Capital-FacStaff (For Faculty/Staff)**

If SafeConnect did not automatically switch you to the appropriate network, manually click on either network to connect.

Once you have **joined** this network you will have full access to the Internet.

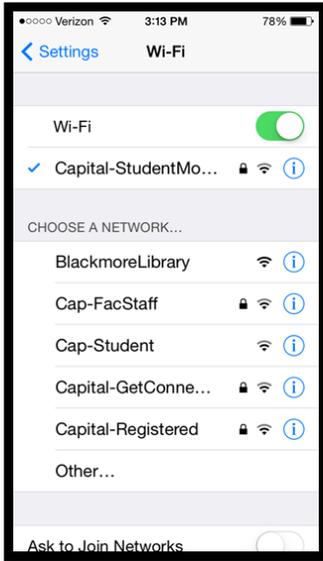

9

Your iOS Device or computer should switch back to the **Safari Browser** with verification instructions.

**Please Note:** Gaming consoles and other media devices such as Wii, PlayStations, Blu-Rays or Apple TV will follow a different set of instructions to register and connect via Wi-Fi or Ethernet cable.

Help documents are available at the IT Help Desk (1<sup>st</sup> Floor of Blackmore Library) and online: <http://www.capital.edu/Getting-Connected>.

10

If you experience any problems getting connected to the university Wi-Fi, please contact the IT Help Desk for assistance via email: [servicedesk@capital.edu](mailto:servicedesk@capital.edu); telephone: 236-6508; or visit us in the Blackmore Library, 1<sup>st</sup> floor desk facing Main Street.
